[Signals without borders](#)

Hamvention 2026 drew a world of kindred spirits to the Greene County Fairgrounds — and reminded us that radio waves have always been humanity's most quietly miraculous language.

[Some thoughts from DXLook on reporting band conditions in Australia](#)

DXLook is my first stop for checking band conditions locally and I use it to determine if I spend time in the shack or go out for POTA. It's that good.

[Andrew Woodard](#)

[The end of POTS is nigh](#)

An Amateur's professional perspective.

[Off Grid Ham](#)

[Trailwave: A native Parks on the Air hunting tool for macOS](#)

Follow live spots, get park details, use maps, track hunted parks, see your history, and keep your parks logging close at hand. QSY to parks with a single click and find digital activators you can hear with WSJT-X integration. Linux and Windows versions available.

[K0VCZ](#)

[Will Meshtastic be the new APRS?](#)

It doesn't replace traditional Amateur Radio, it rethinks how data propagates across a network while preserving familiar concepts.

[Seed Studio](#)

[Farhan talks LARCSet CW & SSB at FDIM with a lot of homebrew wisdom](#)

The entirely analog LARCSet, a 30 dollar SSB/CW monobander.

[Do one thing well: A 24/7 remote JS8 station for 40m](#)

This digi mode is like FT8 but for real QSOs.
[RZ01](#)

[Modern spotting](#)

DX spotting clusters have existed for decades. Originally they were isolated systems accessible via packet radio on VHF or UHF, and therefore limited to the local community.
[Pattern and Match](#)

[GopherTrunk](#)

A new pure-Go trunked radio scanner supporting P25, DMR, TETRA, NXDN and more.
[RTL-SDR](#)

[Celebrating Excellence Across Australian Amateur Radio](#)

A chance to recognise and celebrate the extraordinary individuals who continue to strengthen, innovate, educate, and inspire within the Australian Amateur Radio community.
